

Senior Geologist - Western Europe

An excellent opportunity exists for the right candidate to join and lead the geology department of a dynamic group.

Responsibilities:

- Ø To lead a team of 2 Junior Geologists / Mine Planners to build or upgrade over a period of approximately 2 years:
 1. Robust drilling database incorporating analytical results
 2. Geological mapping of pits
 3. Constructing geological models
 4. Creating Life of Mine Plans
 5. To conduct PERC compliant Reserves and Resources assessments

In addition

- Ø Assist Operations in conducting mining activities to deliver the required volumes at the required quality
- Ø Fulfill all the statutory/regulatory reporting
- Ø Develop a sound understanding of the regional geology and define exploration targets for potential new deposits around existing operations
- Ø Investigate, test and implement new and cost effective drilling techniques
- Ø Implement processes and procedures to enable reassessments of reserves and mine plans, on a routine basis, once the initial assessments have been completed and validated

Required profile :

- Ø Graduate in Geology
- Ø 10 years experience, of which a significant part in Industrial Minerals
- Ø Competence in the use of Surpac
- Ø Experience in Mining Geology preferably in operations with strong and diverse quality requirements.
- Ø Skills in mineralogy would be a plus; the company has strong analytical capabilities but the scope of mineralogical investigations need to be better defined and incorporated in the database and geological models.
- Ø Knowledge of French language is a plus.
